

# **TECHNICAL INFORMATION BULLETIN**

## **FCRemote**

## **Version 2.3**

### **1 Introduction**

FCRemote is a PC based utility that connects to a panel and mimics the panel's front door display. The connection is through a serial communication link that can be sent over the internet with appropriate additional hardware.

### **2 Compatibility**

FCRemote can be run connected to any version of Fireclass panel (FC32/64/240 series).

Prior to panel firmware version 25, the facilities offered are much reduced and allow for the viewing of status only.

From version 25, the access level for users logged in to FCRremote can be configured from Fireclass Express. All features available at the panel can be made available except the Configuration menu option.

### **3 Languages**

FCRemote is available in English, Italian, Spanish and Dutch

### **4 Availability**

FCRemote is available for download from the Fireclass website.
