

M2M
SERVICES

SIMPLICITY.
APPLIED.

SECURE YOUR FUTURE

m2mservices.com

**DROP-IN SINGLE DOOR
ACCESS CONTROL SOLUTION.
FAST TO INSTALL, SCALABLE,
AND DESIGNED FOR RELIABLE
CONNECTIVITY ANYWHERE.**

- **Reliable Connectivity:** Dual SIM and Wi-Fi device, Future-proof with 5G LTE CAT M1 & 2G Connectivity
- **Flexible Management:** Control and configure via the RControl App and web interface
- **Main Features:** Readerless NFC access with smart phone, Wi-Fi or Bluetooth
- **Device interfaces:** 2 inputs + 2 relays for buttons, sensors & door control, two WIEGAND terminals
- **Users:** Up to 1000 mobile credentials/cards

ADVANCED SMART SECURITY PANEL DESIGNED FOR SEAMLESS INTEGRATION OF SENSORS, CAMERAS, AND AUTOMATION DEVICES.

- **Reliable Connectivity:** LTE-M, Wi-Fi, Ethernet
- **Flexible Management:** Interactive security, video verification, smart home automation
- **Remote Control:** Remote programming, troubleshooting and over-the-air firmware updates
- **Sensor Support:** Works with Connect+ encrypted and legacy sensors
- **Easy Control:** Intuitive mobile app for installers and users
- **Residential or Commercial:** 96 zones, 50 users, 8 partitions

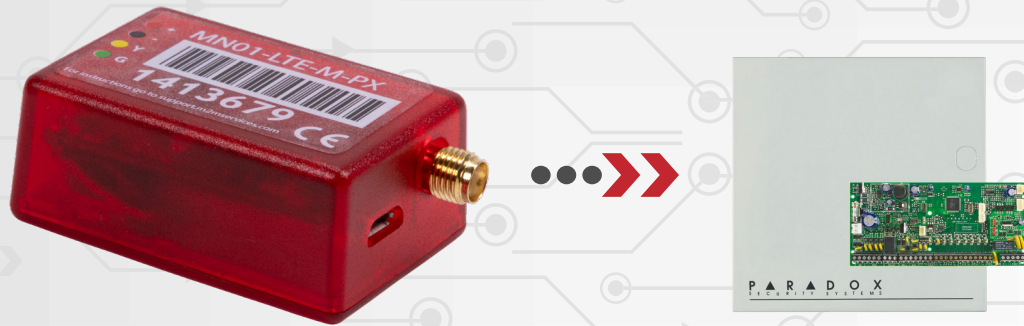

**SMART PERIPHERAL
ECOSYSTEM DESIGNED FOR
SEAMLESS INTEGRATION
WITH CONNECT-FLX
SECURITY SYSTEMS.**

- **Wireless Sensors:** Door/Window Motion, and Smoke Detection
- **Touchpad:** Seamless Control and Monitoring
- **Video:** HD video, Two-Way Audio, Video Doorbells
- **Z-Wave Devices:** Light, Lock, Thermostats and more

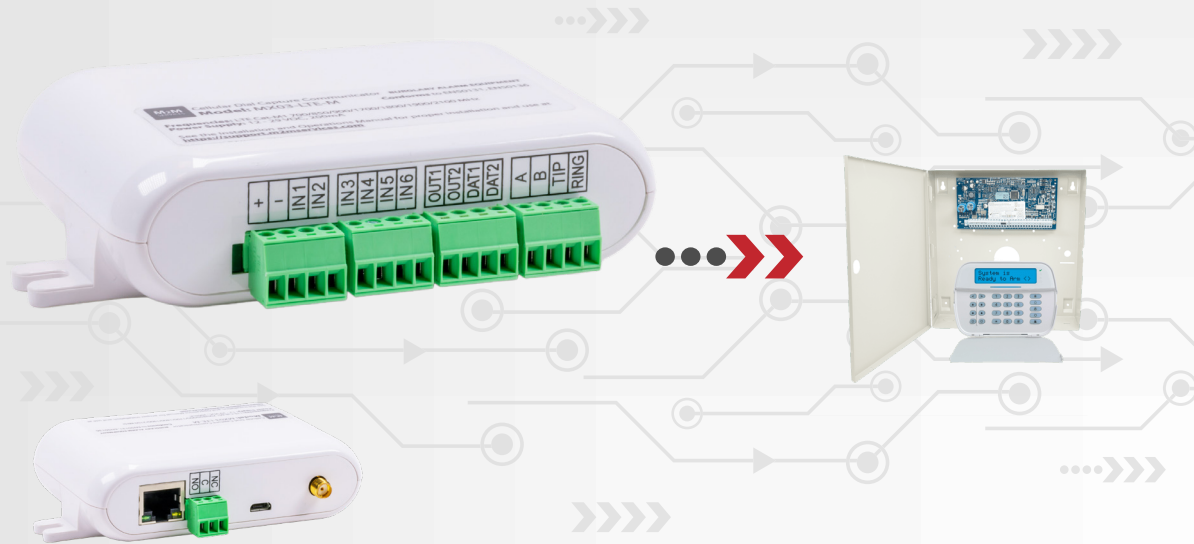

FUTURE-PROOF YOUR SECURITY SYSTEMS WITH DUAL-SIM LTE-M TECHNOLOGY, RECOGNIZED FOR RELIABILITY, COMPATIBILITY, AND REDUNDANCY.

- **Reliable Connectivity:** Dual-SIM LTE-M ensures uninterrupted communication
- **Universal Integration:** Compatible with leading alarm panels
- **Remote Management:** Easy setup and control via the RControl Admin App
- **Expandable Features:** Unlock advanced capabilities when paired with M2M IoT Hub
- **Future-Proof Solution:** Designed to replace obsolete 2G/3G and POTS lines, ensuring long-term reliability
- **Low Fixed Costs:** Predictable monthly fees for optimized long-term expenses

INNOVATIVE ALARM COMMUNICATOR MN01-LTE-M-PX DESIGNED TO INTEGRATE WITH PARADOX ALARM PANELS.

- **Reliable Connectivity:** Dual SIM LTE-M ensures uninterrupted communication
- **Main Future:** Take full control of Paradox panels
- **Serial integration:** Paradox Magellan, Spectra, and EVO alarm panels
- **Expandable Management:** Unlock advanced capabilities when paired with M2M IoT Hub
- **Future-Proof Solution:** Designed to replace obsolete 2G/3G and POTS lines, ensuring long-term reliability
- **Low Fixed Costs:** Predictable monthly fees for optimized long-term expenses

**RELIABLE, FUTURE-PROOF
LTE-M COMMUNICATOR
WITH GLOBAL COVERAGE,
EASY INSTALLATION,
ACROSS ANY NETWORK OR
COUNTRY.**

- **Universal Compatibility:** Works with a wide range of alarm panels and communication formats
- **Triple Path Connectivity:** Dual SIM LTE-M with support for multiple operators per country and optional LAN
- **Simplified Management:** One platform, one app, one communicator – easy to install and manage
- **Future-Proof Solution:** Designed to replace obsolete 2G/3G and POTS lines, ensuring long-term reliability
- **Low Fixed Costs:** Predictable monthly fees for optimized long-term expenses

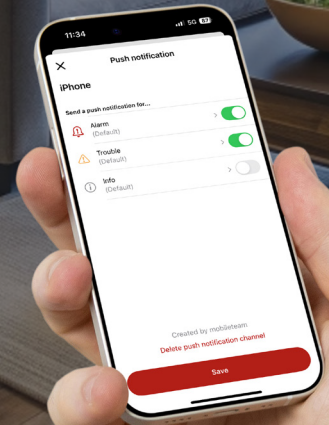

MN01-LTE-M & M2M IOT HUB – COMPLETE ALARM & VIDEO SOLUTION

- **Dual-path:** Upgrade the MN01-LTE-M to a Dual-Path communicator
- **Video Verification:** Add video alarm verifications to your MN01-LTE-M and MX03-LTE-M communicators
- **Cameras:** Universal ONVIF and RTSP support
- **Wi-Fi Connectivity:** Stable wireless connection for smooth performance
- **Easy Setup:** Configure Wi-Fi and cameras via RControl Admin App

ENHANCE YOUR MN01-LTE-M AND MX03-LTE-M COMMUNICATORS WITH SEAMLESS REAL-TIME VIDEO MONITORING FOR COMPLETE SECURITY CONTROL.

Better Together: MN01-LTE-M and M2M IoT Hub combine to deliver solutions for advanced alarm communication and video verification.

- **Reliable Connectivity:** Dual-Path device supporting Dual SIM LTE-M and LAN technology
- **Future-Proof Solution:** Seamlessly replaces outdated 2G/3G and POTS lines for long-term reliability
- **Compliance:** Certified according to EN54 and designed to meet any other global safety regulations
- **Seamless Integration:** Universal compatibility with industry standard fire panels and protocols. Serial port integration with selected panel brands/models

**RELIABLE AND SECURE FIRE
ALARM SIGNALING WITH
DUAL SIM REDUNDANCY,
LTE-M, AND REMOTE
MANAGEMENT.**

Footnotes:

1. USB port to support Dual path communication (IP + Cellular) via add-on M2M Hub
2. For a list of all compatible panels please visit support.m2mservices.com
3. Additional MN01-RNGR device is needed to use UDL with MN01-LTE-M and MX03-LTE-M

About Us:

At M2M Services, our motto, "Simplicity. Applied.," guides everything we do. With headquarters in Bulgaria and three offices in the United States, we deliver smart, dependable, and cost-effective IoT solutions worldwide. Our growing family of brands - Alula, Uplink, and SecureNet further enhances our technology stack and solidifies our position as an industry leader in smart security.

Trusted by 7,000+ professional alarm companies across 40+ countries, with 1.5 million active devices, we deliver reliable, innovative solutions that meet the evolving needs of the security industry.
