3. What's new

3.1 Optimizations

(1) Optimized VCA events.

❖ This version supports the configuration of up to four independent regions for VCA events, enabling precise and flexible monitoring. Additionally, the schedule setting interface enables configuring any period to trigger VCA events, this feature allows tailored monitoring, activating VCA events only at desired times, enhancing security, and minimizing false alarms.

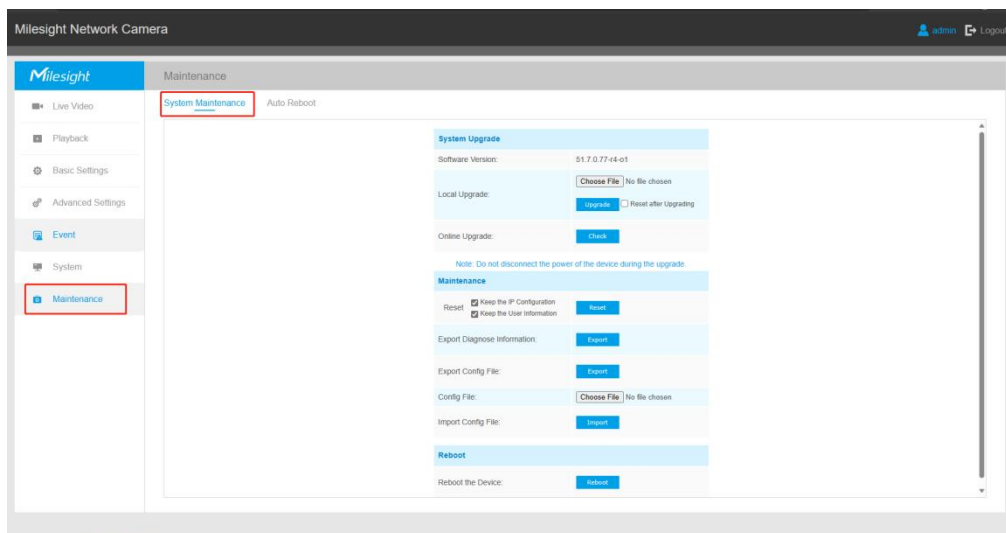

(2) Supporting various metadata fields and json format, allow for seamless compatibility with third-party security systems.
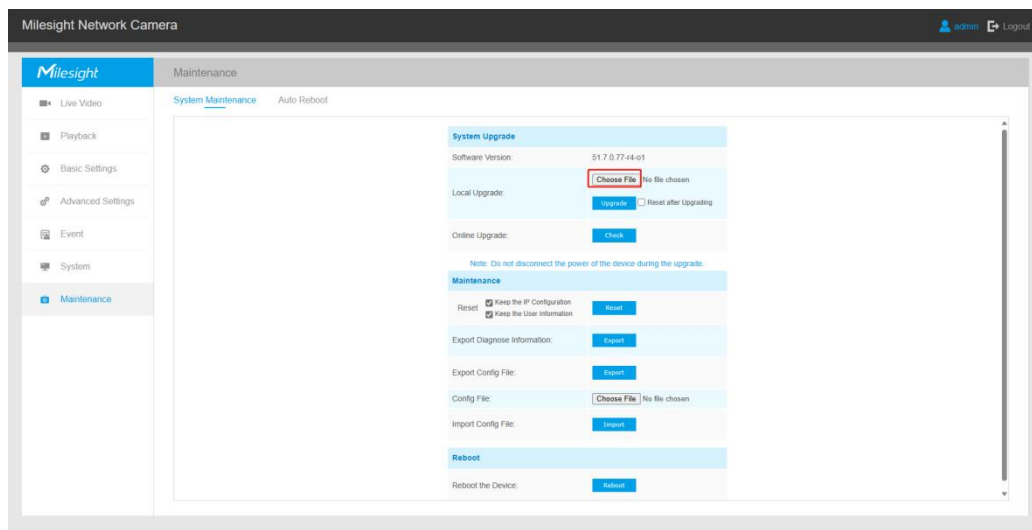

(3) Updated Russian translation.

4. Upgrade steps

Please check each model with the right firmware version as mentioned above, then upgrade as the following steps:
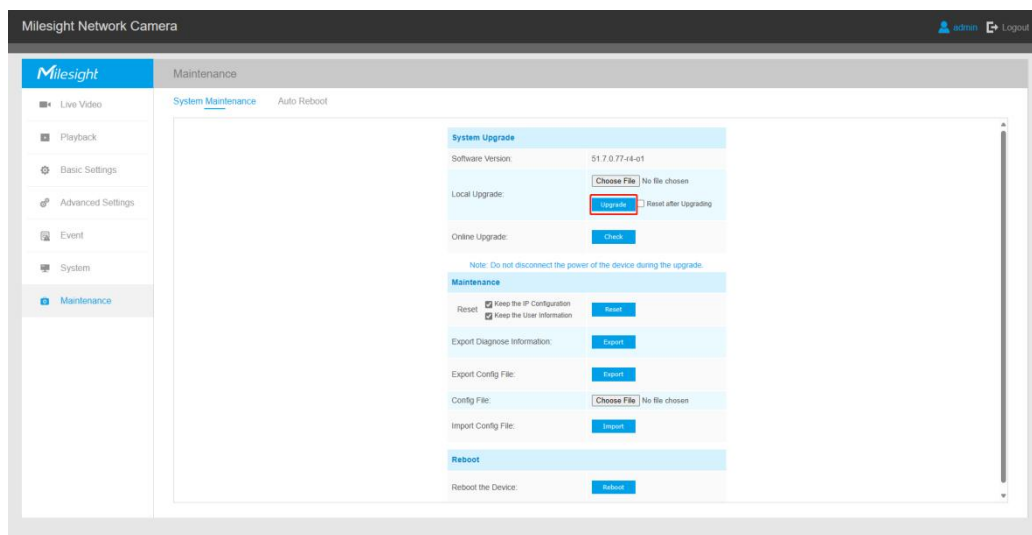

**Step 1:** Go to the web page of Network Camera, Configuration -> Maintenance -> System Upgrade.

Step 2: Choose file for the upgrade.

Step 3: Click the "Upgrade" button, then please wait about 1~3 minutes. The upgrade will be done after the system restarts successfully.

You can also choose the Online Upgrade to check whether the version is the latest, if it is not, please make sure the network is stable and then choose Online Upgrade.
