# IPC\_G6101-B5012P10D1702NB

## **Release Notes**

## IPC\_G6101-B5012P10D1702NB Release Notes

Keywords: Version information, version upgrade

#### Abstract: This document provides detailed version information and upgrade procedure for

IPC\_G6101-B5012P10D1702NB.

#### Acronym:

| Acronym | Full Name |
|---------|-----------|
| IPC     | IP Camera |

### 1.3 Version Mapping Table

Table 2 Version mapping table

| Product Mapping Item | Version No. (For External) |  |
|----------------------|----------------------------|--|
| NVR                  | B3121                      |  |

#### Table 3 Product models and corresponding versions

| Product Series   | IPC Series                                                            |  |  |
|------------------|-----------------------------------------------------------------------|--|--|
| Series           | IPC2121SR3、IPC2122SR3、IPC321SR3、IPC322ER3、IPC312SR                    |  |  |
| Туре             | IPC2121SR3 Series : IPC2121SR3-PF36、IPC2121SR3-PF60、IPC2121SR3-PF120  |  |  |
|                  | IPC2122SR3 Series: IPC2122SR3-PF36、IPC2122SR3-PF60、IPC2122SR3-PF120   |  |  |
|                  | IPC321SR3 series : IPC321SR3-VSPF28、IPC321SR3-VSPF40、IPC321SR3-VSPF60 |  |  |
|                  | IPC322ER3 series : IPC322ER3-DVPF28、IPC322ER3-DVPF36、IPC322ER3-DVPF60 |  |  |
|                  | IPC312SR series : IPC312SR-VPF36、IPC312SR-VPF28                       |  |  |
| Target file name | IPC_G6101-B5012P10D1702NB.zip                                         |  |  |

### 2 Feature Change Description

P10D1702:

| Item                    | Feature                 | Description                                                                                                                                                                                                                                                                                                                         |  |
|-------------------------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Newly added<br>features | LAPI interface          | Added LAPI interfaces for alarm output status, device time, device info, live video URL and preset                                                                                                                                                                                                                                  |  |
|                         | IPC email<br>encryption | Added STARTTLS encryption mode                                                                                                                                                                                                                                                                                                      |  |
|                         | suppress<br>WDR stripes | suppress WDR stripes of indoor light environment                                                                                                                                                                                                                                                                                    |  |
| Improved<br>features    | Watermark               | Supports H.264/H.265, compatible with NVR                                                                                                                                                                                                                                                                                           |  |
|                         | Uniform OSD<br>styles   | Offers uniform OSD styles: OSD size (X-large, large, medium, small,<br>FontSize: 0, 1, 2, 3); Min. Margin (Non, Single, Double, Margin: 0, 1, 2),<br>Background Effect (Background, Stroke, Hollow, Normal, FontStyle: 0,<br>1, 2, 3), among which the dot-matrix library only supports Background<br>and Normal (FontStyle: 0, 3). |  |
|                         | New toolbar<br>icons    | Uses new icons for video toolbar                                                                                                                                                                                                                                                                                                    |  |
|                         | E-mail                  | All ordinary alarm support linkage Email                                                                                                                                                                                                                                                                                            |  |
|                         | People                  | When connected to NVR, OSD and reset operations performed on NVR                                                                                                                                                                                                                                                                    |  |
|                         | counting                | can be synchronized to IPC.                                                                                                                                                                                                                                                                                                         |  |
| Deleted<br>features     | None                    | None                                                                                                                                                                                                                                                                                                                                |  |

## 3 Version Upgrade Description

Reversion to P10D1604 or earlier is not allowed once the firmware is upgraded to P10D1611 or later. Contact our technical support if reversion is necessary in an exceptional case.

## 4 Version Upgrade Procedure

### 4.1 Upgrade Overview

### 4.1.1 Version Upgrade Environment

1. Network Architecture for Upgrade

Figure 1 Network architecture

As shown in this figure, the version files are stored on the PC that is connected to the IPCs through the network.

### 4.2 Upgrade Procedure

#### 4.2.1 Upgrade Through the Web

- (1) Log in to the Web interface as admin (default password: 123456).
- (2) Click Setup > Maintenance > Device Maintenance. The Device Maintenance page is displayed.
