Operating System	Microsoft Windows7/Windows8 (32-bit or 64-bit).
CPU	Intel Pentium IV 3.0 GV or higher.
Memory	1GB or higher.
Network card	Gigabit Ethernet network card (or higher) are recommended.

Item	Requirements
Display definition	1280*720 or higher.

**Note**

To display multi-channel videos simultaneously or videos of higher resolution requires higher hardware configuration.

The software operates on a 32-bit operating system or on a 64-bit operating system that can host 32-bit software programs.

The recommended hard disk space for EZPlayer should be able to store 1080P (6Mbps bit rate) video for one week. To store more channels of videos with longer time, use hard disks with larger capacity. To figure out the hard disk space required, please use the formula: capacity (GB) = stream (Mbps) x 60 x 60 x 24 x days x channel numbers/8/1024. For example, the capacity of a 6Mbps video stored for seven days is about 443GB; the capacity of 25 channels of CIF (1Mbps stream) videos stored for seven days is about 1.8TB.
